Subject Index

Acetaldehyde 263–267, 277, 343
Acetaminophen 38
α-Adrenergic receptor 83–97
Adriamycin 326–334
Ah receptor 203–214
Alcohol dehydrogenase 258, 261–267, 277
Aldehydes 73–81, 141–157, 273
Allyl alcohol 55, 117
Anoxia 18
Ascorbic acid 57–61, 240, 283, 284, 309–314, 318–323, 325–334, 343
Ascorbyl radical 325–334
ATP 49

BCNU 17
p-Benzoquinone 28–30
Bile 217, 218
Biliary atresia 217
Biliary cirrhosis 217
Biliary epithelial cells 245–253
Bilirubin 217, 229–233, 348
Bilirubin oxidase 229–233
Blebs 23–34, 38, 271, 274
Bromobenzene 55–62
t-Butyl hydroperoxide 14

Calcium homeostasis 18, 22, 34, 41, 45–54, 56, 73, 83–97, 99, 285–299
Calcium sequestration 83–97
Calcium transport 37
Cancer of the liver 129, 133, 203–214
Carbon tetrachloride 13, 38, 45–54, 63–72, 73–81, 108, 110, 218, 245, 248, 335–342
β-Carotene 346–351
Cell division 165–175
Cholesterol 248
Choline deficiency 133–139, 187–201, 222
Cirrhosis 134, 269–274, 343–351
Cumene hydroperoxide 87–96, 245–253
Cyanamide 262
Cysteine 18
Cytochrome P-450 13, 77–81, 107–115, 123, 129, 168–170, 203–214, 230–233, 248–253, 255–260, 273, 301–308
Cytochrome P-450IIE1 255–260
Cytoskeletal proteins 23–31, 38
Cytoskeleton 28

Dehydroascorbic acid 58–61
Diamide 27
Dibromoethane 63–72, 99–105
Dichloroethane 64
Diene conjugation 135–139, 187–201, 269, 275, 343
Diethylmaleate 55
2,3-Dimethoxy-1,4-naphthoquinone 28–30, 41
Dithiothreitol 26
DNA damage 21, 135, 137, 141–157, 159–163, 209–214
DNA strand breaks 40
Dolichol(s) 335–342

Electron spin resonance spectroscopy 325–334
Endonucleases 38

Enflurane 109, 114
Ethanol 218, 255–260, 261–267, 275–280, 343
Ethionine 49, 223
N-Ethylmaleimide 87–94

Fatty liver 134–139, 171, 218, 343–351
Fluoride 107

Glutathione 17, 22, 28, 41, 55–62, 63–72, 79, 83–94, 99–105, 117–125, 240, 248–253, 262, 263, 265, 270, 277, 285, 291, 309–314
Glycogen phosphorylase 47–54
Golgi apparatus 335–342

Haem 107–115, 231
Haemolysis 118
Halothane 13, 107–115
Hepatoma 129, 165–175
Hexachlorobenzene 203–214
Hydrogen peroxide 21, 27, 203–214, 229, 256–259, 263, 266, 298
Hydroxyalkenals 136, 141–157
Hydroxyl radical 21, 137, 209, 266
4-Hydroxynonenal 75–81, 130, 141–157
Hypoxia 14, 261, 264

Indomethacin 178–185
Iron 75, 87, 117–125, 203–214, 235–243, 317–323, 329
Iron overload 235–243
Ischaemia 23
Isoflurane 109, 114
Lipid peroxidation 13, 21, 49, 55–62, 63–72, 73–81, 84–97, 117–125, 133–139, 141–157, 165–175, 177–185, 187–201, 212, 235–243, 252, 257, 261–267, 269–274, 275–280, 286–299, 301–308, 309–314, 317–323, 326, 329, 339, 343
Liver regeneration 165–175, 177–185

Membrane potential 99–105
Menadione 21–34, 39, 91, 252–253
Methionine 18
Methyl glyoxal 159–163
4-Methyl-pyrazole 262
Methyltriphenyl phosphonium 286–299
MH_1C_1 hepatoma 129
Mitochondrial damage 235–243
Mitochondrial transmembrane potential 99–105, 285–299
Morris 44 hepatoma 129

NADPH 18
Necrosis 134, 218
t-Nitrosobutane 136
Novikoff hepatoma 129, 165–175

Paraquat 326–334
Partial hepatectomy 165–175, 177–185
Phenazine methosulphate 27
Phenylbutylnitrone (PBN) 136
Phospholipases 37
Phospholipid hydroperoxide glutathione hydroperoxidase 317–323
Phospholipid hydroperoxides 301–308, 317–323
Polybrominated biphenyls 203–214
Polychlorinated biphenyls 203–214
Polyhalogenated aromatic chemicals 203–214
Porphyria 203–214
Prostaglandins 177–185
Proteases 38
Protein oxidation 21
Protein thiols 28, 32–34, 56, 248–253, 291

Regenerating liver 165–175, 177–185
Reoxygenation injury 13
Retinol 349
Ruthenium Red 291–299

Sister chromatid exchange 148–155, 159
Spin trapping 326–334
Suicide inactivation 110
Superoxide 21, 27, 137, 209, 241, 242, 256–259, 263, 266, 298
Superoxide dismutase 177–185, 231, 241, 256, 263, 284

2,3,7,8-Tetrachloro-dibenzo-p-dioxin 229–233
Thioacetamide 269–274
Thymidine kinase 172–175
α-Tocopherol 49, 53, 165–175, 238–240, 283, 309–314, 317–323, 326, 335–342, 343
Trolox C 55, 120, 123

Uric acid 348, 349
Uroporphyria 203–214
Uroporphyrinogen decarboxylase 203–214

Verapamil 269–274
Viral hepatitis 218
Vitamin E 57, 65, 129, 165–175, 177, 238–240, 277, 279, 283, 286–299, 309–314, 317–323, 326, 335–342

Wilson's disease 217

Yoshida hepatoma 129–133, 165–175
